THE SKY & FLYING THINGS

Portfolio Description

I explore the vibrant dynamics of the sky including slow astronomical objects to swift livings such as butterflies, and the moments where they intersect.

HUES OF EMOTION

The Milky Way

Central bulge glows with golden cores, purple arms, blue stars, and dark dust lanes, contrasting against the dark sky. 1000+ seconds of exposure stacked from different locations and times.

LUNACHARACTER

The Moon

The moon's usual white color transforms into vivid purplish and bluish hues through the stacking of 300 photos, revealing its character. These colors emphasize volcanic regions and surface details, showcasing titanium-rich mare and pyroclastic deposits from ancient eruptions.
